PROFILE

A cybersecurity engineer, with experience ranging from network administration to web application testing. Proficient in OWASP Top 10. Independent Security Researcher, assigned CVE-2022-3992

SKILLS

Web Application Security Testing
Burp Suite, sqlmap, Postman, OWASP Zap

Network Forensics
Wireshark, pcap analysis

QA end-to-end testing
cypress.io

Network Penetration Testing
nmap, Kali Linux, Metasploit

Vulnerability Assessment
Tenable Nessus, Qualys

Information Security

Software Engineering
Python, MySQL, Bash scripting, Javascript

Code Review
Sast, Dast, Python, Php, Secure software development

Python

CERTIFICATES

- Qualys Certified Specialist(Qualys)
- Network System Technician (NST)
- Information security awareness(Fortinet)_
- Jr penetration tester path(Tryhackme)
- Pentesterlab Code Review Badge

- Foundation of Operationalizing MITRE ATT&CK(AttackIQ)
- Cloud Fundamentals(Great learning)_
- Cybersecurity Fundamentals(IBM)_
- Certified AppSec Practitioner
- Linux Priviledge Escalation

- Cybersecurity Engineer(VTF)
- Cisco Cloud Security Knowledge
- Certificate in Cyberscurity(ISC2)
- Practical Ethical Hacking
- Windows Privilege Escalation

AWARDS

Assigned-CVE-2022-3992, *Vulndb*   14th November 2022
Cross-site scripting on sanitization management system

PROFESSIONAL EXPERIENCE

Application Security Researcher, *Self Employed-Remote*   November 2021 – present | Lagos, Nigeria
- Bug Bounty Hunter on crowdsourcing security testing platforms like HackerOne and Bugcrowd
- Performed OWASP Top 10 security evaluations using Burp Suite and Kali Linux
- Researched security vulnerabilities in open-source software, achieved CVE-2022-3992

EDUCATION

Diploma In Software Engineering,   February 2022 – present | Lagos, Nigeria
National Institute Of Information Technology
Python, logic, building algorithms, MySQL database, Mathematics, projects to build Python tools

Certificate Program in Network System Administration/Technician,   September 2021 – December 2021 | Lagos, Nigeria
Indian Institute Of Hardware Technology
Calculated ip subnets for host and servers, Network configuration and Lan configuration using packet tracer, Tcp/ip modeling, Bgp configuration, Firewall configuration, vlan setting ,Trunking, Network troubleshooting from command line, Understanding topologies and Network security.
